Current position and desired work position

I am a passionate **Software Engineer**, graduated with M.Sc. from the University of Bologna in the Faculty of Computer Engineering.
I currently work as a **backend engineer** in fintech environment.
My interest is related to the development of distributed systems, with focus and experience in backend, security and also particular attention to UI/UX design for frontend.
I am always open to work in dynamic teams with different projects and new technologies, following Agile best practices for collaborative development, focused primarily clean architecture, to grow as professional developer.
